k .- New York Times.

Salt Means Much to Health. "If the human race should be deprivof salt, even for a period of a few onths," said a physician, "we would ot only lose a natural healthful incenve for our food, but disease, with all s attendent miseries, would spread ith such relentless speed as to defy ie efforts of the most skillful doctors of the land. Ailing persons frequently refuse sugar, but they seldom turn up heir moses at common salt. That is ecause there is in the body a defilency of chloride of sodium, and naare intuitively excites the desire for it Salt is essential to health and life and is as much a food as bread or flesh. If there is no wish for salt in a person, doctors uniformly conclude that disease in some form is lurking insuspected in the system. It is an imperative duty of those who have at heart the well being of their fellow creatures to impress upon them that if they wish their blood to be in a healthy

condition they must make salt a fre-

quent article of diet."-Chicago News.

French Burial Customs. The ancient custom of depositing valuables in tombs still prevails in France. But it is not only jewels and the like that are buried with the dead. A few years ago it was the custom in La Vendee to put a polished stone within reach of the corpse. This was supposed to guide the dead on his new journey. In the district of Dinan a piece of bread was used for the same purpose. The people of the Bordeaux distict place in the coffin a sprig of more blessed at Easter. This is consi red to insure entry into paradise. On the borders of Brittany and Poitou a fittle pebble is placed on the tongue of the deceased. Without this it is thought he might plead his cause before the great tribunal with such volubility as would insure his condemnation without appeal.-Journal des De-

A Scene Not on the Bill. An amusing incident in the Royal Opera House at Warsaw, Russian Poland, is described by the Paris Temps. By permission of the commanding officer a number of Russian soldiers were engaged as "supers" to take the part of Spanish soldiers. No sooner had me on the stage than they saw a general sitting in the stalls. The corporal with them immediately shouted. "Attention!" The soldiers stood at attention. The general, realizing that the men were not likely to move until he gave them the order, cried from the stalls, "All right, my childrem, all right!" The corporal advanced to the center of the stage and. gravely saluting, said, "We thank you, excellency, for permission to con-

Insects In Flight. Motion pictures of insects in flight prove that the movement of the wings of all insects presents the same general character. When flight is begun the amplitude of the first wing beats is much smaller than of the subsequent ones, but the period remains almost unchanged. The insect regulates the velocity of its flight, not by the rapidity of the motion of its wings, but by changing their inclination. Although in normal conditions the period of the wing beat remains constant, it may be increased or diminished by various in-

Office Lawyers "Office practice is what the average lawyer seeks for now," remarked an attorney, "and that is the business that makes the largest returns for the least waste of tissue. More money is made nowadays by keeping clients out of litigation and free from the dangers of the law's delay than by defending them, even successfully, in court. It is safe to say that there are some 6,000 lawyers who are making a very good living in New York from law business that rarely or never takes them into court and that there are a large number of lawyers who from their counsel work and directing great enterprises and corporations, advising and guiding wealthy citents, take in each year princely-yes, even fabulous -amounts."-Lawyers' Diary.

Romance of a Statue. The statue of Charles I, which now stands in London was sold to a brazier during the commonwealth with the understanding that it should be broken up. The buyer, however, saw a chance to make money and buried it instead. To cover his action he made a large number of bronze knives and forks, which were eagerly bought by both royalists and Puritans as souvenirs. When the monarchy was restored to power the statue was dug up again and bought by the government to be placed in its present position, where it has remained since 1674.

He Quant to Get It. "On what grounds do you seek a divorce from your wife?" asked the law-

"Simply because of a pun," replied the long suffering husband. "You see, she's a sculptress, and it gets on my nerves to hear her remark twenty times a day, 'Will you love me when I mold? "-New York Times.

Reynaud, caoutchouc is strongly attracted by the ultra violet Some ducks when they get big have rays from the mercury vapor lamp drakes. Drakes don't have to set or ful source of such rays. This fact has hatch, but just loaf and go swimming a practical bearing in connection with and eat everything in sight. If I was balloon envelopes, which are treated with caoutchouc. Aeronauts are famillar with the discovery that the envelopes suffer during ascensions, and this is explained by the greater effect of ultra violet rays at high altitudes. One of the most startling changes Experiment had already led to using ver seen in any man, according to W. Jellow coloring matter on the envelopes, and red balloons are sometimes ected years ago in his brother. "He seen, but never blue or violet. M. ad such a dreadful cough." he writes. Reynaud considers that red is the best that all our family that he was going | color to use, as it not only absorbs the nto consumption, but he began to use ultra violet rays, but also the blue completely cured by ten bottles. Now rays, and these last are likely to share

Rock Salt Discovered by Accident. The great rock salt deposits of Louisiana were discovered by accident in May, 1862. Salt was very scarce at that time, and the proprietor of the Island's salt works, John Marsh Avery, determined to profit by it. With this end in view he commenced to deepen his wells. One negro workman, after going down sixteen feet, came to Mr. Avery with the news that he had struck a sunken log, and could proceed no further. Mr. Avery investigated and found, not a log, but the great rock salt deposit that has made Louisiana famous throughout the country. The discovery did not come altogether as a surprise, as Thomassy had predicted that a great rock salt deposit would one day be discovered in each of o recommend this preparation for sore the five Gulf islands, and perhaps in broat, boarseness, or any affliction of other portions of the state. Since the he throat or lungs. I know it will do close of the war, rock salt has been all claimed for it."
